Data Science For Engineers(NPTEL online certification)

Social Networks(NPTEL online certification)

PERSONAL PROJECTS

Disease Prediction using ML
- This machine learning project aims to predict the likelihood of a person developing a certain disease based on their medical history and lifestyle factors, using a dataset of past patient records.

Early Warning Proactive System Security in Software Defined Networks
- the proliferation of cyber-crime and the urgent demand for the development of effective techniques to address major challenges in cyber security, particularly through the application of machine learning and deep learning techniques while acknowledging the difficulty in employing such techniques effectively.

Computer vision projects
- Worked on multiple openCV projects like Color detection and shape detection

EXTRA CURRICULAR

Volunteer at Play For Cause (2021 - 2023)
"Play for a Cause" is a dedicated volunteering group that has been organizing football tournaments for two years, with proceeds going towards a special cause each year. I volunteered as a Team head to organize the tournament.

Member of Organising Commitiee at KMIT (2020 - 2022)
Organised various college events, I participated as a Team Lead to organise events.
